Bereila FRETUS Tube dispenser kit

Bereila, member of the ASEPT Group, has developed the FRETUS Tube dispenser kit especially for occasions where sauces are dispensed from tube bottles.

Hygienic, user-friendly and portion controlled.

Ideal dispensing

Tube bottles are ideal for the use in fast-service outlets, petrol stations, sports canteens, company restaurants and any other similar situation. They are handy, can be stored well and the user is not tied to any large packaging unit. The FRETUS tube dispenser kit, a complete set of footplate, holders, adaptor rings and FRETUS pumps, is available for 2, 3 and 4 tube bottles.

Maximum ease of use

The FRETUS pump, by ASEPT, is simple, smooth and easy in operation. With a simple movement, the sauces are dispensed without shaking and squeezing bottles. The FRETUS pump empties the tube bottle to a maximum. This increases the yield and the added value for your customer!

Clean and hygienic

The FRETUS Tube dispenser kit offers tube bottles a fixed place on the buffet or in the kitchen of your customer. No more bottles lying around, but clean and tidy, ready for use in the stylish holder.

The FRETUS pump is easy to (re-) assemble and easy to clean.

Customized

For the connection of the FRETUS pump dispenser to your specific tube bottle, Bereila provides corresponding adaptor rings. In addition it is possible to have your trademark in the stylish stainless steel foot plate to create maximum brand exposure.

The benefits of the FRETUS Tube dispenser:

- ▶ Easy and quick operation
- ▶ Portion control
- ▶ Maximum emptying
- ▶ No-drip, clean and hygienic
- ▶ Easy and complete disassembly and cleaning
- ▶ Dishwasher safe (except for foot plate)
- ▶ 100% Food Grade materials
